

Nofar Ganon

Learning Technologies graduate with distinction, with hands-on project experience in UI/UX design, game development, and interactive experiences. Combines user experience and visual design with implementation in Unity and C#. Experienced in creating interfaces, user flows, and interactive prototypes, and refining them through user testing and feedback. Brings critical thinking, attention to detail, and the ability to work independently and collaboratively.

Work Experience

Cybernet College | 2025 – 2026

Instructional Content Developer

- Developed interactive English lessons built around storylines tailored to the target audience and learning objectives.
- Created visual assets and voice-over content to support the narrative and lesson activities.
- Structured content and instructions with a focus on clarity and user experience, refining them based on feedback.
- Produced supporting documentation to help instructors deliver lessons easily and consistently.

Tel Aviv University | 2024 – 2025

Learning Systems Implementer

- Implemented and maintained digital courses in Moodle and CampusIL, providing ongoing user support.
- Maintained the department website using Drupal and contributed to the design and development of digital content.
- Collaborated with academic pedagogy and technology teams to support clear, user-friendly learning experiences.

Education

Holon Institute of Technology (HIT) | 2023 - 2026

B.A. in Learning Technologies

Academic Projects

Trip to Space – Unity | 2D Educational Game

Game Experience Design, UI/UX & Development in Unity and C#

A space-themed matching game combining educational content, character movement, and time-based challenges.

- Developed the game concept and storyline, defined rules and mechanics, and planned the overall gameplay experience.
- Mapped the player journey and screen flow, from the opening screen and tutorial through gameplay, including instructions, feedback, and progression.
- Designed the visual language and all screen elements, including the character, game environment, buttons, and UI components.
- Built the game in Unity using C#, implementing character movement, object interactions, match validation, and time and game state management.
- Conducted user testing and refined the interface and gameplay experience based on findings.

Lumina Cast | Mobile Projector Control App

UI/UX Design & Interactive Prototyping

A mobile app that brings projector setup and controls into one place, replacing the need to switch between a remote, a manual, and on-screen settings.

- Defined the user journey and information architecture, including onboarding, initial setup, and navigation across the app's features.
- Designed flows that break complex tasks into clear steps, with contextual guidance and feedback.
- Designed screens and UI components and developed a consistent design system covering typography, colors, buttons, and interaction states.
- Created a dark visual language with neon accents inspired by projected light, and built an interactive prototype demonstrating user flows and interface behavior.

Military service

IDF Intelligence Corps – Technological Unit 81 | 2019 – 2022

Electronics Technician

- Work in a classified technological environment.
- Support of complex systems and collaboration within professional technical teams.
- Operational responsibility, task leadership, and training delivery.
